

Samuel Plum

Senior DevOps Engineer

Colorado Springs, CO | splum@talaria.com | 310-347-8393 | LinkedIn: [linkedin.com/in/samuelpaum](https://www.linkedin.com/in/samuelpaum)

SUMMARY

Senior DevOps Engineer with 10+ years of experience maintaining high-availability production infrastructure for global-scale platforms. Expert in Kubernetes, Terraform, Linux administration, and CI/CD pipeline design, with experience in configuration management (Puppet, Ansible), Grafana/Prometheus observability, and database administration (MySQL, Elasticsearch). Proven record of automating operations, improving reliability, and supporting product teams across complex, distributed environments.

SKILLS

Scripting & Programming: Python, Javascript, Bash, Java, Perl, C++, C#

Cloud / Platform Engineering: AWS, Azure, EKS, Hybrid

Infrastructure as Code: Terraform, Ansible, Puppet, CF Engine

CI/CD Architecture & GitOps: Git, GitHub, GitHub Actions, GitLab, Argo CD, Azure DevOps, Jenkins, Octopus Deploy, Docker, Packer, Helm, Kustomize, Jira, Confluence

Orchestration & Administration: Kubernetes, Apache / Tomcat, Linux Administration, EC2

Database & Queue Administration: MySQL, Postgres, Elasticsearch, CouchBase, RabbitMQ, Redis

Observability & Incident Response: DataDog, LogicMonitor, Grafana, Prometheus, Nagios, PagerDuty

Networking: VPC / ELB / Route53, Istio, Netscaler, NetApp NFS

PROFESSIONAL EXPERIENCE

Greenshades Software — DevOps Engineer (Apr 2023 – Aug 2025)

- Owned high-availability production infrastructure targeting 99.9% uptime for 24/7 critical systems.
- Built and maintained CI/CD pipelines using Argo CD and Octopus Deploy for controlled releases.
- Managed Infrastructure as Code with Terraform to strengthen reliability and disaster recovery.
- Operated Docker and Kubernetes environments supporting stable services under load.
- Improved observability, reduced alert noise, and lowered MTTR through proactive monitoring.
- Led incident response and drove long-term reliability improvements in production.

PayPal / Happy Returns — Software Engineer, Cloud Infrastructure (Jan 2022 – Apr 2023)

- Supported high-availability AWS production systems with strict uptime and performance requirements.
- Operated RDS (PostgreSQL, MySQL) in production, improving reliability and performance.
- Automated cloud infrastructure using Terraform and improved CI/CD workflows for safer releases.
- Participated in incident response and root-cause remediation to strengthen production reliability.

ELocal.com — DevOps Engineer (Jun 2019 – Dec 2021)

- Standardized containerized deployments on Kubernetes (EKS) to improve scalability and fault tolerance.
- Built GitLab CI/CD pipelines to improve deployment safety and release auditability.
- Enhanced service reliability and security through improved traffic management and service communication.
- Built monitoring and alerting with Prometheus to strengthen observability and reduce MTTR.

Advertise.com — Senior Systems Engineer (Jan 2014 – Mar 2019)

- Operated and scaled high-availability production systems supporting high concurrency and 24/7 traffic.
- Automated Puppet-based configuration management across multi-environment infrastructure to reduce manual intervention.
- Improved monitoring, observability, and incident response workflows to lower MTTR.
- Supported Redis and Elasticsearch in production to strengthen caching, logging, and system reliability.

EDUCATION & CERTIFICATIONS

- Computer Science Coursework, Oklahoma State University
- AWS Certified Cloud Practitioner
- CompTIA Network+
